## Education

|                                                      |                  |
|------------------------------------------------------|------------------|
| <b>CMR College of Engineering &amp; Technology</b>   | 2023 – 2027      |
| B.Tech - Computer Science Engineering (Data Science) | CGPA: 7.91/10    |
| <b>Narayana Junior College</b>                       | 2021 – 2023      |
| Intermediate (MPC)                                   | Percentage: 94%  |
| <b>SPR School of Excellence (SSC)</b>                | 2021             |
| Class X                                              | Percentage: 100% |

## Technical Skills

**Programming:** Python, Java, C, SQL

**Frontend:** React.js, JavaScript, HTML, CSS, Tailwind CSS

**AI & Data:** Machine Learning, Data Analysis, Pandas, NumPy, Data Visualization

**Tools:** Git, GitHub, VS Code, Supabase, Gemini AI

## Experience

|                                                                                                                                                                       |      |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Data Analyst Intern – Rixi Labs</b>                                                                                                                                | 2025 |
| <ul style="list-style-type: none"><li>Worked on data preprocessing, visualization, analysis workflows, and extracting insights using Python.</li></ul>                |      |
| <b>Google Student Ambassador</b>                                                                                                                                      | 2026 |
| <ul style="list-style-type: none"><li>Selected to represent Google student initiatives, promote AI learning, and engage with student developer communities.</li></ul> |      |

## Projects

|                                                                                                                                                                                                                                                                                        |      |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>GoldenHour – AI Emergency Response System</b>                                                                                                                                                                                                                                       | 2026 |
| <i>React.js, Supabase, Gemini AI</i>                                                                                                                                                                                                                                                   |      |
| <ul style="list-style-type: none"><li>Built an AI-powered emergency coordination system connecting ambulances, hospitals, and police departments.</li><li>Integrated AI-generated medical summaries and real-time patient information sharing for faster emergency response.</li></ul> |      |
| <b>Saathi – AI Student Success Companion</b>                                                                                                                                                                                                                                           | 2026 |
| <i>React.js, Gemini AI</i>                                                                                                                                                                                                                                                             |      |
| <ul style="list-style-type: none"><li>Developed an AI-based platform helping students discover scholarships, opportunities, and academic guidance.</li><li>Created personalized assistance features focused on improving student accessibility and support.</li></ul>                  |      |
| <b>Long-Term Stock Price Prediction</b>                                                                                                                                                                                                                                                | 2025 |
| <i>Python, Machine Learning, LSTM</i>                                                                                                                                                                                                                                                  |      |
| <ul style="list-style-type: none"><li>Built machine learning models to analyze historical stock data and forecast market trends.</li><li>Implemented predictions using Regression, Random Forest, and LSTM models.</li></ul>                                                           |      |

## Achievements

|                                                                                                                                           |      |
|-------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Winner – Techsynapse National Level Hackathon</b>                                                                                      | 2026 |
| <ul style="list-style-type: none"><li>Secured 1st place with 16000 cash prize for developing GoldenHour AI healthcare solution.</li></ul> |      |
| <b>Runner-up – Prometheus'26 Hackathon</b>                                                                                                | 2026 |
| <ul style="list-style-type: none"><li>Secured 2nd place with 10000 cash prize among competing technical teams.</li></ul>                  |      |
| <b>Winner – VISISTA 2K25 Presentation Competition</b>                                                                                     | 2025 |
| <ul style="list-style-type: none"><li>Secured 1st place for presenting innovative technical ideas and solutions.</li></ul>                |      |

## Certifications

- Cisco Verified Certification – Introduction to Data Science
- Cisco Verified Certification – Networking Basics
- Rixi Labs – Data Analytics Internship Certification
